ADVANCED ANTI-THEFT FEATURES AND OFFERINGS

Theft attempts (Jemmy Bar)

High Security ANTI-Theft lock designed after extensive analysis of 500+ actual theft site visits. More than 50+THEFT TESTS conducted in controlled setup on actual doors to ensure product's strength. **BREAKING FORCE** of anti-theft solution is 5 TIMES more than ordinary main door lock.

- Thicker "ANTI BEND" cover ring & fixing plate for extra strength of lock cylinder.
- Armoured "ANTI BREAK" door protection plate enhances the strength of main door against crow bar attack.
- Improved "ANTI-THEFT" Solid steel/brass dead bolts.
- Strengthening sandwich plate for lock body and receptacle for enhanced strength of the lock.
- Thicker "ANTI TEAR" receptacle with flanging on hole to enhance breaking load to prevent breakage during theft attempts.
- "ANTI THEFT" STRENGTHENING PLATE which enhances the strength of wooden door frame to prevent theft.
- Specially designed heavy duty "ANTI RIP" SCREWS to enhance strength.
- BIGGER & THICKER KEY with extended length; high precision machined with micron accuracy; to eliminate duplication. An ordinary identical dimple key without these floating balls can not open this lock.
- Precision machined lock assembly with 20 LOCKING PINS made with Swiss machine and the presence of 2 FLOATING BALLS creates an "Interlocking Mechanism, which provides an extremely high level of security.
- 5 Crore Non-Interchangeable key combinations.
