

CENTRE SHUTTER LOCK - MODEL:S310/S320

INSTALLATION PROCEDURE:

The EUROPA Center Shutter Lock is a high security locking system and it has to be installed correctly to ensure trouble free performance. Only an experienced technician should install it, strictly following the instructions mentioned below. Please contact your nearest Europa Lock dealer if you require any assistance.

NOTE : 1) GAP G1 SHOULD BE EQUAL ON FRONT & BACK SIDES.
2) GAP G2 SHOULD BE EQUAL ON LH & RH SIDES.

1. Fold the MARKER along the bottom edge (shown by dotted line). From inside of shutter place the MAEKER on the SHUTTER SECTION BOTTOM STRIP as shown in FIG.2
2. Mark centers 'A','B','C','D','P', and 'Q' (as shown on the MARKER) with center Punch. During marking ensure that the bottom edge MARKER should match to the bottom ben edge of SHUTTER bottom strip.
3. Drill 9mm.Dia. holes at centers 'A','B','C' and 'D' for mounting the lock.
4. Drill 18mm Dia. hole at center 'P' and 3mm Dia. at center 'Q'
5. To prevent the dust entering through the key hole, rivet the DUST COVER on the SHUTTER from outside at center 'Q' with RIVET supplied.
6. Fix the LOCK on the SHUTTER using M8 COACH BOLTS (provided with lock set). Two side FLANGES are provided for welding the LOCK with shutter. (IF POSSIBLE AVOID WELDING).

FIXING RECEPTACLE:

Use cement concrete mixture for fixing RECEPTACLE assembly. As shown in Fig.3 LOCK should enter the Receptacle in centered position so that there is equal gap on FRONT and BACK sides and on R.H. & L.H. sides. (Before pouring concrete mixture, keep engaged the two end locking levers of the Shutter.)

FINAL CHECKING OF LOCK OPERATION :

CONFIRM LOCK FUNCTION AS FOLLOWS

1. To LOCK the SHUTTER LOCK from OUTSIDE rotate the key by 150° anti clockwise. To OPEN it rotate the key by 150° clockwise. To remove the key, it should be on its original position in both cases.
2. To LOCK the SHUTTER LOCK from INSIDE, rotate the key by 360° and clockwise. To OPEN it rotate the key by 360° clockwise. Key can be removed after 360° rotation in either case (for S320 only.)
3. To confirm opening & closing of the LOCK possible, in wet condition of concrete.
